

## ***INTERCEPT™ GERMAN ENVIRONMENTAL PRIZE 2005/6***

We are honoured to inform you that we have been awarded the German Environmental Prize for "New Environmentally Safe Methods for Corrosion Protection" for INTERCEPT products.

Out of over 2000 applicants we have made second and will be awarded with the official hand-over on October 6<sup>th</sup>, at the Petersberg in Bonn, the Guest House of the German Government. Following the award ceremony there will be a fair in Munich on November 21-24 where we have the chance to display our products for 30 min. Both events are covered by the national television. After the award is being handed over, INTERCEPT will be promoted in their official documentation which is distributed to every responsible person in each company for health and safety issues. During the fair, we will have a display room with products. The fair also focuses on the environmental management of all German companies. The ministry made it clear that they will assure us of a nation-wide coverage for our products and direct support by all their technical advisors for getting the product known in the market place.

Kindest regards,

Peggy Langlotz-Krökel
